

# Loopring WALLET

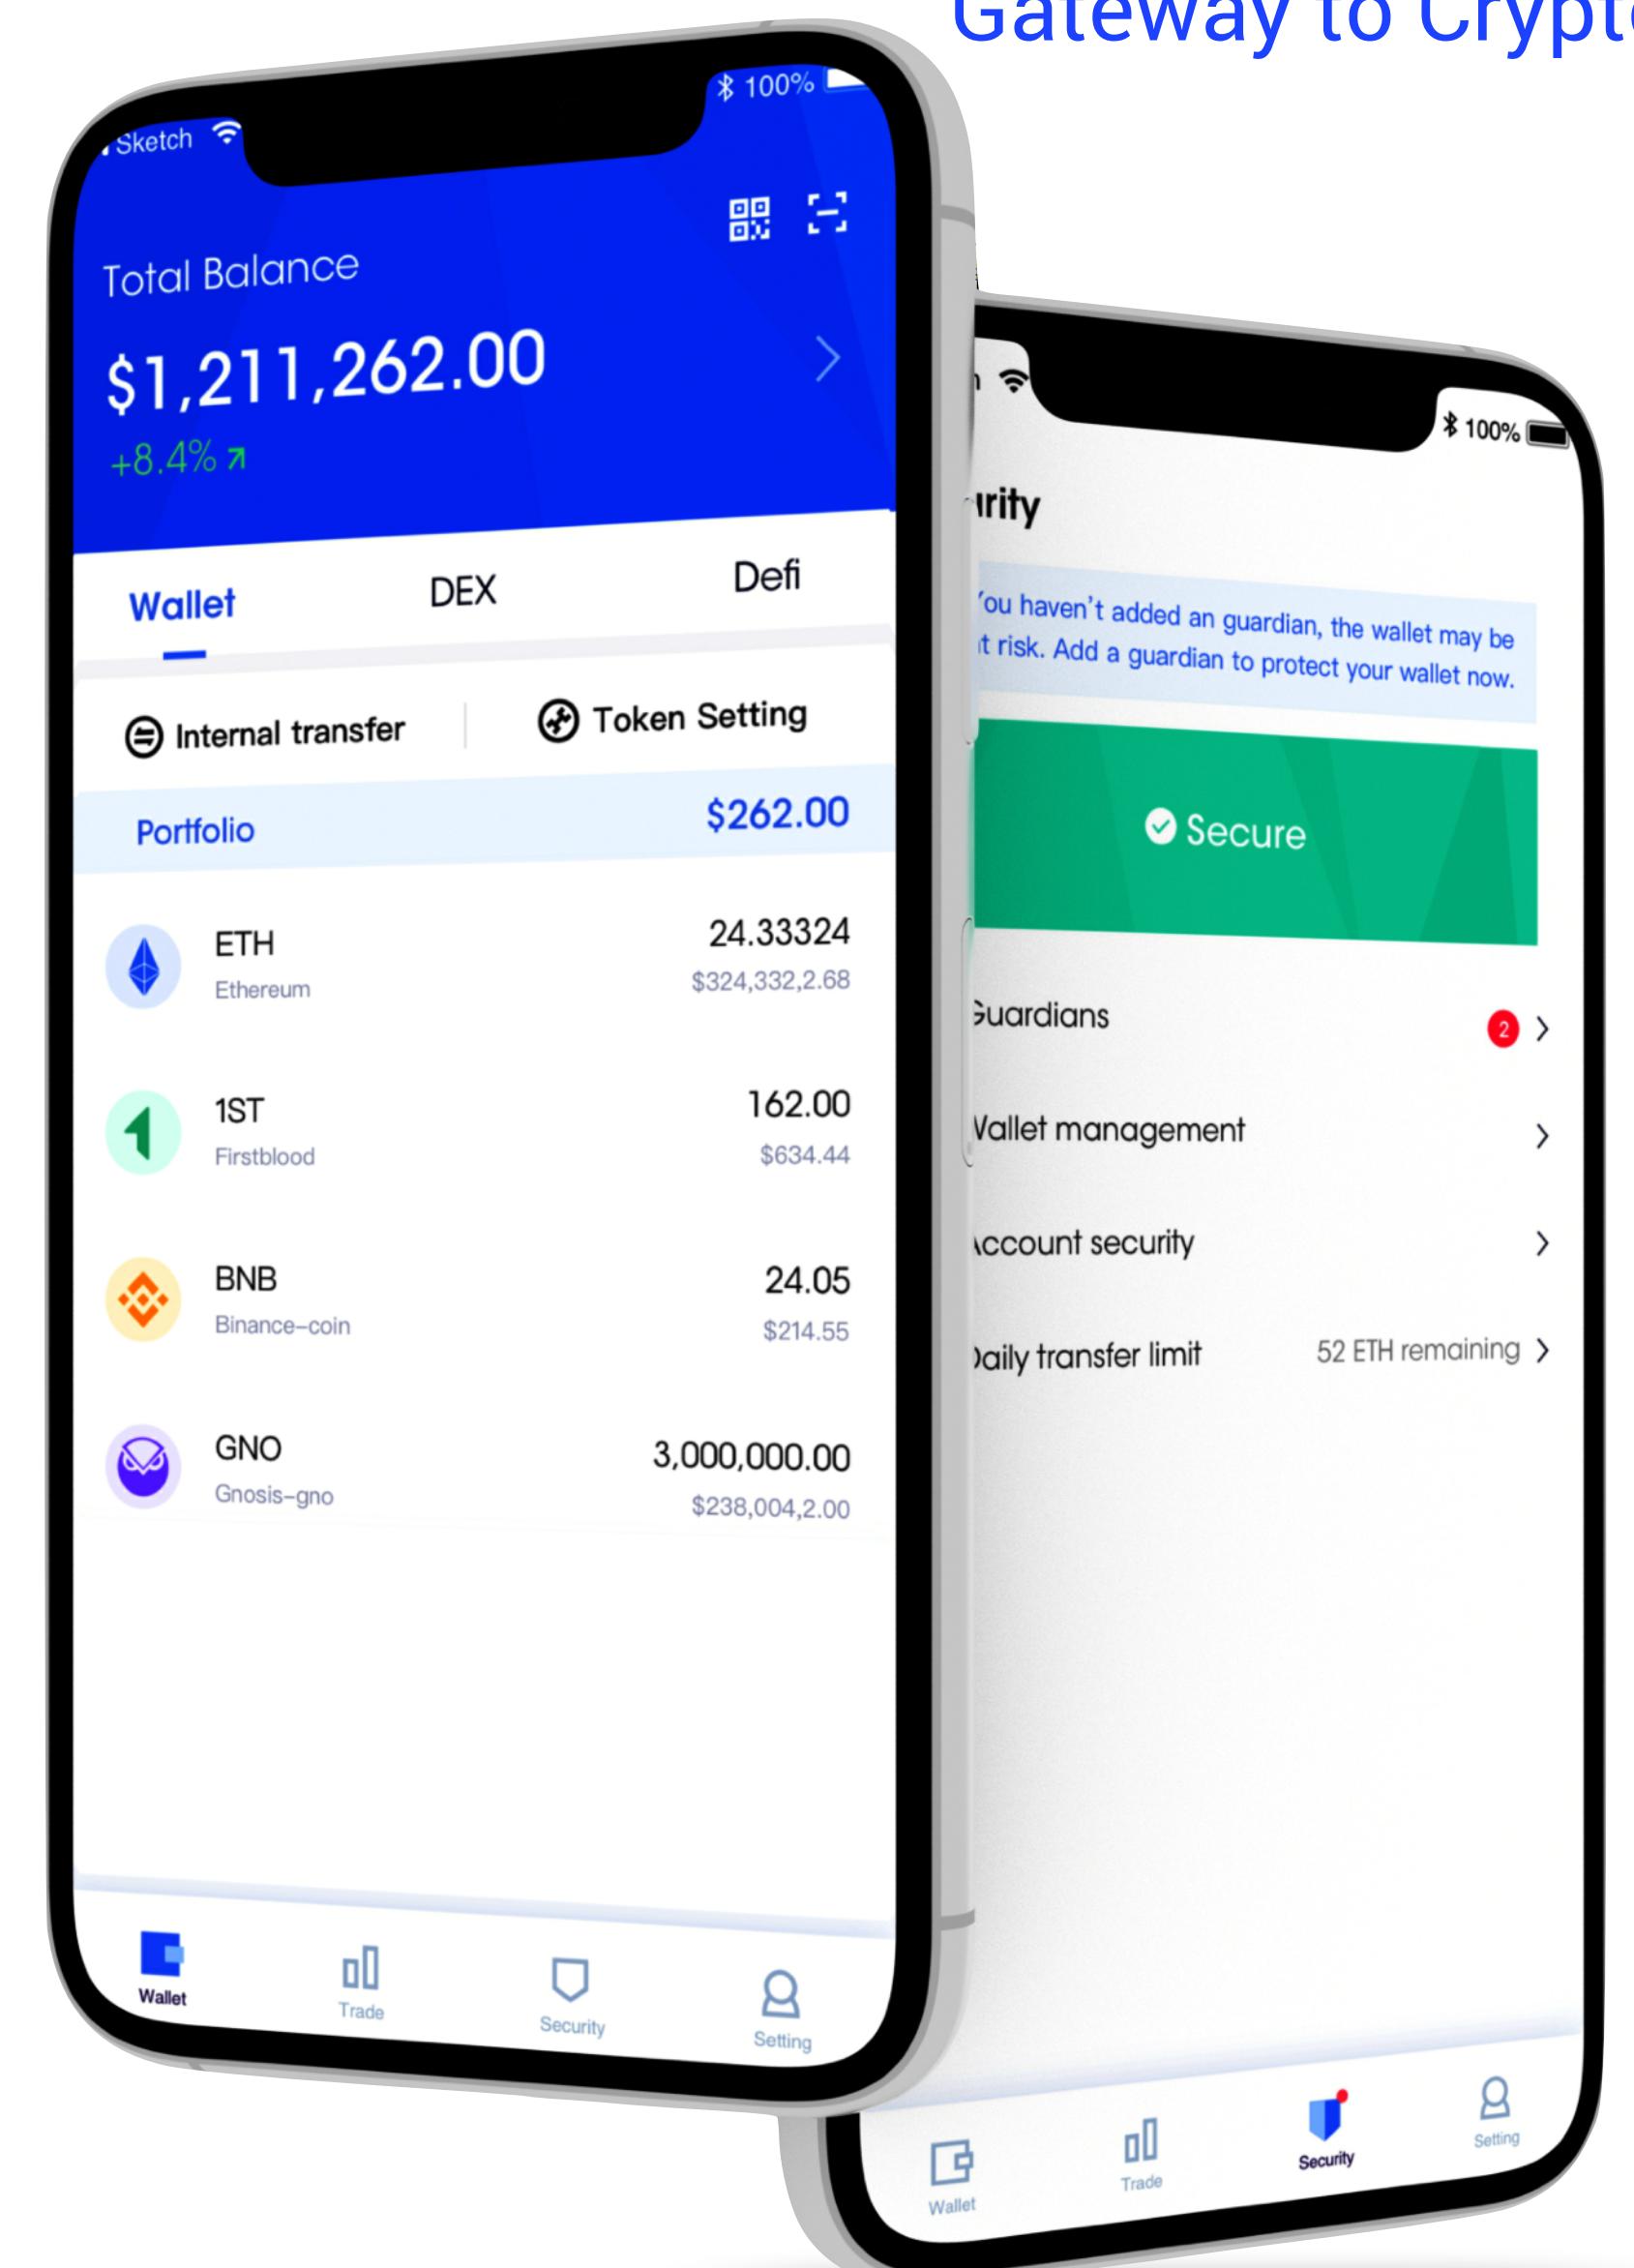

Loopring developed the world's first zkRollup-protocol for crypto exchanges and payment.

1 The **Loopring Protocol** scales Ethereum's performance by 1000X and reduces trading and payment costs by 800X.

2 Loopring Exchange is a non-custodial crypto exchange. We also offer Relayer-as-a-Service for WeDEX, another decentralized exchange.

3 Loopring Pay is our layer-2 fast payment service, it is capable of supporting tens of millions of active users for crypto transfers with neglectable fees and immediate apparent finality.

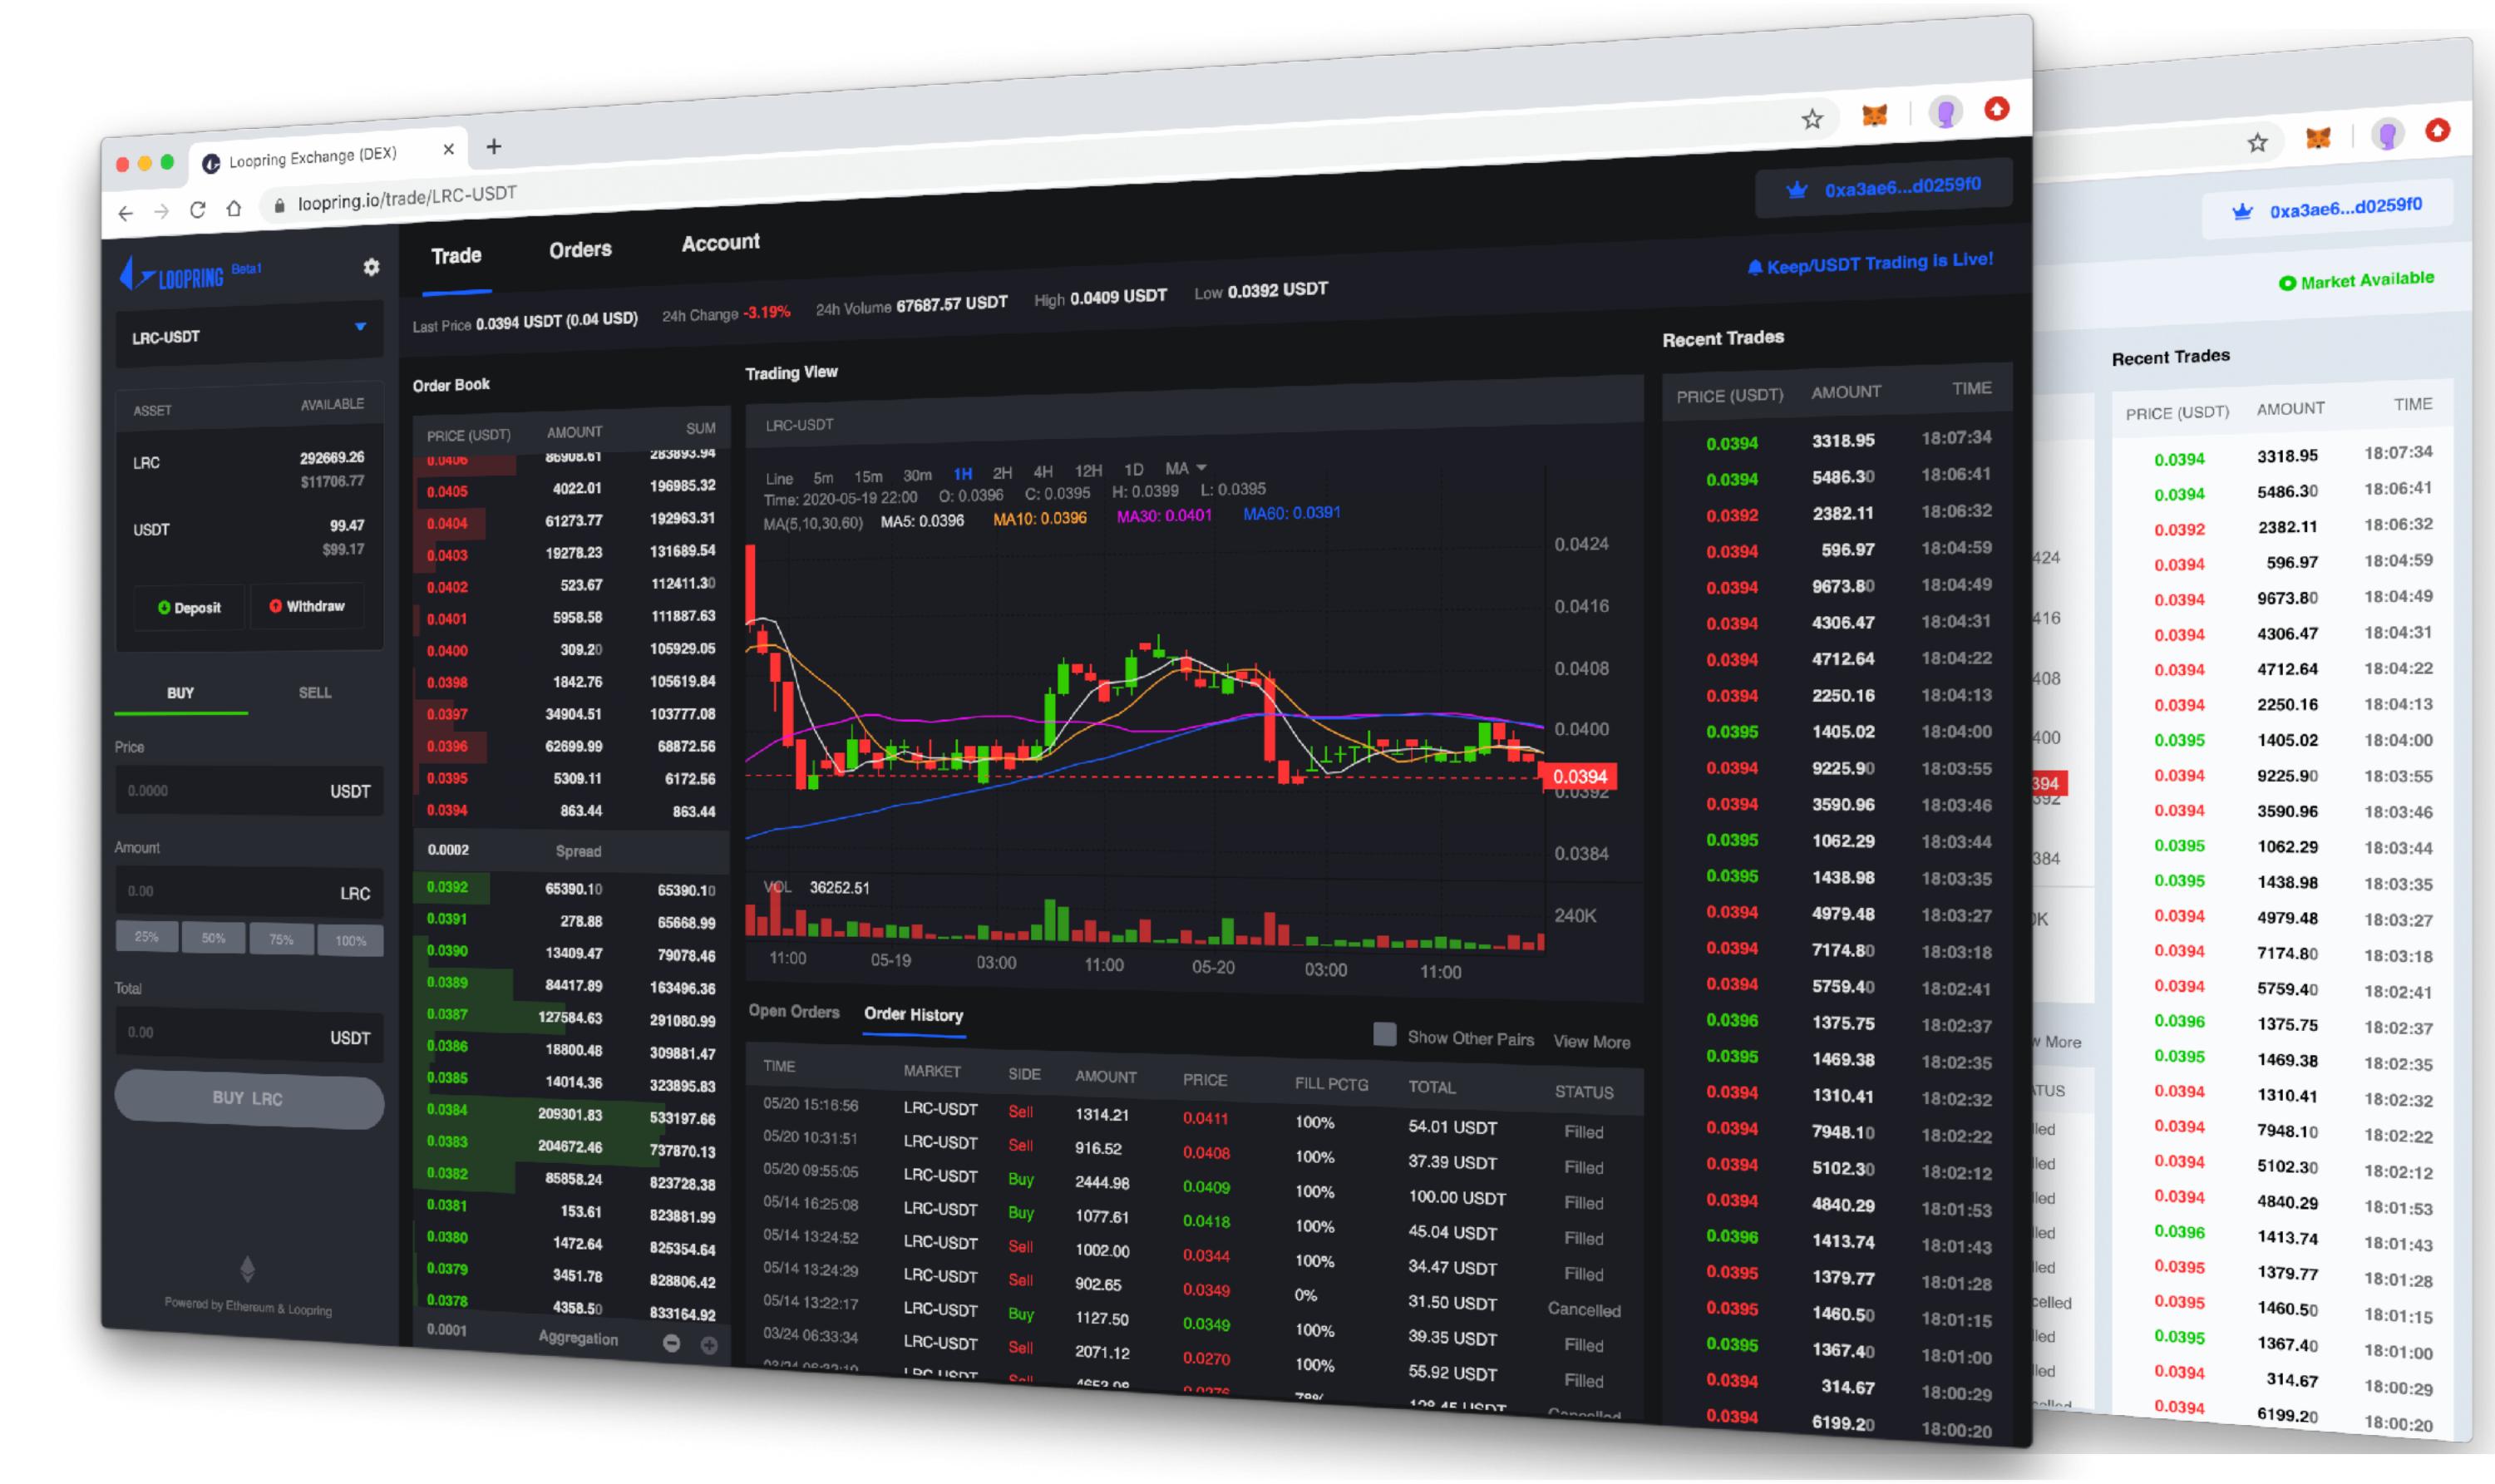

4 Loopring Wallet is a smart wallet mobile app for the general public. Our goal is to make it the average users' gateway to Decentralized Finance (DeFi). We are also integrating Loopring Pay and Loopring Exchange into Loopring Wallet for the best user experience.

Gateway to Crypto & DeFi

# Loopring EXCHANGE

World's First zkRollup DEX
